Professional Experience

Production/QA & Tech Student Mentor, DigiPen

09/2025 – 04/2026 | Redmond, WA

- Mentor and support 180+ students across 12 interdisciplinary game teams in Production and QA.
- Developed and distributed task management, bug reporting, and back logging resources. That over 5+ teams have adopted into their production pipeline.
- Partner with other student mentors and faculty across game design, programming and art disciplines to identify team communication breakdowns and recommend Production/QA process adjustments.
- Designed and hosted 3 workshops for Producers & Quality Advocates, translating production and QA best practices into repeatable team workflows.

Production Skills

Production & Tools

Agile, Jira, ClickUp, MS Excel, PowerPoint, Production Scheduling & Milestone Planning, Task/Bug Triage, Back-log Ownership, Claude Code, OpenAI, Risk Identification, Task Scope Management, Perforce, GitHub

Collaboration & Communication

Cross-Functional Collaboration, Meeting Facilitation, Adaptability in Fast-Paced Environments, Conflict Resolution, Presentational Speaking

Education

B.S. in Computer Science and Game Design,
DigiPen Institute of Technology
04/2026 | Redmond, WA

Projects

Guard Dog on Duty 🔗 ,

Producer | Team of 12 | Unreal Engine 5.4
01/2026 – Present

- Coordinated 3 programmers, 3 artists, 4 game designers, and 2 sound designers to deliver from concept to production to deliver a playable game, that is now wishlistable on Steam
- Negotiated with an IP team to receive publication support and IP rights.
- Communicating with the team and facilitating team wide meetings for sprint planning.

Gambler's Fallacy 🔗 , Producer | Team of 10 | Unity 2023.2

09/2024 – 04/2025

- Collaborated with a cross functional team of 8 programmers, 1 game designer and 1 artist.
- Owning sprint planning, task prioritization and milestone delivery to keep development on schedule.
- Oversaw the project from pre-production to shipping on Steam, by defining scope and tracking velocity to hit 6 key milestones.
- Facilitated weekly playtests to gather data on systems balance and to validate build stability. Reviewed data with system and game designers to iterate on genre defining systems.

Chemical Overdrive,

Producer | Team of 10 | Unreal Engine 5.2
09/2023 – 04/2024

- Oversaw an interdisciplinary team of 7 other programmers, 1 sound designer, and 1 artist.
- Coordinated daily production workflows in ClickUp and Excel by triaging tasks and bug reports, prioritizing work, and assigning action items to keep the team on schedule.
- Evaluated feature impact against production constraints, player and stakeholder feedback. Refactoring combat to prioritize movement mechanics.
- Adjusting sprint plans and back-log priorities based on playtest feedback and task status to maintain scope.
- Recognized a lack of interactivity with ClickUp from the team, therefore swapping and implementing task tracking standards and quality tests in Excel checklists to monitor build status, surface issues early, and guide sprints.
