

QUALITY ASSURANCE

CHECKLIST, BUG REPORTING, TEST
MANAGEMENT

BY: JULIAN LOAIZA

WHAT IS A Q.A. ADVOCATE?

You are the **voice of the player.**

In game development you are the **bridge between the development team and the player.**

Ensuring that the product is **bug-free** but meets the **standards of user experience and satisfaction.**

Demonstrate Calf Size		[Build Version] 1.0.3.3	SVN Commit ID: 328		
Requirement Type	Location In Build (If Necessary)	Description of Item to Check	Testing Status	How Check was Done	Comments/Issues
<i>Class / Project</i>	<i>ex: Level 1, Main Menu, Pause Menu, etc.</i>	<i>Be as detailed as possible - someone who isn't familiar with your project should be able to look at the test description and perform it</i>	<i>Passed / Partial / Fail</i>	<i>Describe how items were checked to its current status</i>	<i>Any comments or known issues for the item</i>
Ex. Class	Ex. Main Menu	Quality Plan and Checklist.docx"	Ex. Passed		
		Build			
Class		Verify build notes reflect the submission including SVN commit ID	Passed	Build Notes displays the build version 1.0.3.3 and SVN commit ID at 328	
Class		Functionality is present as expected for UX/UI and mechanics	Passed	See Content, Art, and Audio sections for specifics	
Class		current stage of development	Passed	See Content, Art, and Audio sections for specifics	
		Build Notes			
Class		Explain if anything new was added	Passed	Information on added content listed in Build Notes	
Class		Explain if any changes happened	Passed	Information on what has changed displayed in Build Notes	
Class		Explain any known issues / bugs	Passed	Information on known issues listed in Build Notes	
		Submission			
Project		Build Notes and completed Test Acceptance Plan at the top level of zip file.	Passed	Folder has the Build Notes and Test Acceptance Plan	
Project		Zip folder submitted in moodle	Passed	Folder submitted on moodle	
		Content			
Project	Main Menu	Start Button goes to Level 1	Passed	Clicked the Start button in Main Menu, taking me to the game level	
Project	Main Menu	Sound Zoo button goes to Sound Playground.	Passed	Sound Zoo button from Main Menu spawns player in the Zoo Level	
Project	Levels	controls.	Passed	Can move with WASD and mouse moves the camera	
Project	Levels	Player Jump	Passed	Can press spacebar to jump	
Project	Levels	Player Attack/Dash	Passed	In the level, pushing left click has the player dash/attack; Destroys enemies	No longer can go flying across the sky
Project	Levels	In levels, ESC key opens a pause menu.	Passed	Pressed the Escape Key.	
Project	Levels	Energy Bar Mechanic	Partial	Moving player increases energy bar at top left of screen; Stopping slowly removes energy	If any ground isn't perfectly flat, the player is considered on a slope and
Project	Levels	Grinding Mechanic	Partial	Can jump on rail and grind; Grind real fast if boost then jump on.	Jumping off rail jumps character straight up sometimes.At end of rail, ch
Project	Levels	Melee Enemy	Failed	Not Implemented; current build has Base Enemy in	Correct enemy not implemented in the current build
Project	Levels	Ranged Enemy	Failed	Not Implemented; current build has Base Enemy in	Correct enemy not implemented in the current build
Project	Levels	Homing Ranged Enemy	Failed	Not Implemented; current build has Base Enemy in	Correct enemy not implemented in the current build
Project	Levels	Dynamic camera zoom in/out based on player speed	Passed	Ran around and boosted to check camera adjustments	Moving forward zooms camera out. Boosting moves camera even furthe
Project	Levels	Nitro Ability	Partial	Nitro can be used as long as the player has enough energy.	Standing still doesnt boost you at all
Project	Levels	Player Control Instructions	Passed	In level one, instructions shown on left of screen.	
Project	Levels	Slide down hills	Partial	Went down ramp and gained speed	

BUILD CHECKLISTS

WHAT IS THE BUILD CHECKLIST?

It is a tool that is used **before** a new build is submitted. It ensures the following:

- 1) The Build is **Playable** and **Stable**
- 2) Contains **Updated** Assets
- 3) **Doesn't Break** Core Gameplay or UI
- 4) Used to **maintain consistency between builds**. So teams **always** know what's included and working.
- 5) It is **dynamic** and should **evolve** with the project as features are added or removed.

Demonstrate Calf Size		[Build Version] 1.0.3.3	SVN Commit ID:3	
Requirement Type Class / Project	Location In Build (If Necessary) ex: Level 1, Main Menu, Pause Menu, etc.	Description of Item to Check Be as detailed as possible - someone who isn't familiar with your project should be able to look at the test description and perform it	Testing Status Passed / Partial / Fail	How Check was Done Describe how items were checked
Ex. Class	Ex. Main Menu	Quality Plan and Checklist.docx"	Ex. Passed	
Build				
Class		Verify build notes reflect the submission including SVN commit ID	Passed	Build Notes displays

Project	Levels	Sliding down hills	Partial	Went down ramp ar

WHAT IS THE BUILD CHECKLIST **NOT**?

It is **NOT** the following:

- 1) It's not a **replacement tool** for **bug tracking**
- 2) It's **not** a **one-person** task. Designers, programmers, and artists should **all review** their own and others content.
- 3) It's **NOT** a chore and shouldn't feel like it. It's here to find bugs and verify items.

Demonstrate Calf Size		[Build Version] 1.0.3.3	SVN Commit ID:3

BUILD CHECKLIST EXAMPLE

Provided By - DREAmwIN

Demonstrate Calf Size		[Build Version] 1.0.4.0	SVN Commit ID:4		
Requirement Type	Location In Build (If Necessary)	Description of Item to Check	Testing Status	How Check was Done	Comments/Issues
<i>Class / Project</i>		<i>Be as detailed as possible - someone who isn't familiar with your project should be able to look at the test description and perform it</i>	<i>Passed / Partial / Fail</i>	<i>Describe how items were checked to its current status</i>	<i>Any comments or known issues for the item</i>
Ex. Class	Ex. Main Menu	and Checklist.docx"	Ex. Passed		
M4 Rubric					
Class		Rubric named "Demonstrate Calf Size M4 Rubric.xlsx"	Passed	Checked M4 Teams folder	
Class		Game Name, Team Name, and Team Roster sections filled out on "Team & Grade" tab	Passed	Present in the Rubric	
Class		Each tab's "Student Comments" section is filled out	Passed	Every section applicable is filled out	
Prototype Installer					
Class		Create an installer named "Chemical Overdrive Prototype.exe"	Passed	Chemical Overdrive Prototype.exe is created in the folder structure	
Class		Test installer on clean machine to see if it works	Passed	Ran on Clean Machine. No issues.	
Class		Installer has a custom icon	Passed	Has an icon of the player's bat.	
Class		pop-up.	Passed	Using Unreal so this is already done.	
Class		The DigiPen EULA can be found on Team Project Resource	Passed	Using up-to-date DigiPen EULA downloaded from the GAM 300 Moodle page.	
Class		No Reboot During Installation	Passed	No reboot required.	
Class		No Development or Source Control Files Installed	Passed	Game built in shipping mode. NO source control files are present.	
Class		No Debug Builds/DLL's	Passed	No debug DLL's and Build was built in shipping mode.	
Class		location if they wish.	Passed	Game installs \Program Files (x86)\DigiPen\Chemical Overdrive Prototype	
Class		admin only directories—use the proper user files location instead	Passed	Game does not create or modify any files in the installation folder.	
Class		The shortcut must have a custom icon.	Passed	Creates a shortcut on desktop by default but can be removed.	
Class		course—make sure you test it. The start menu shortcut must have a custom icon.	Passed	Shortcut does have a custom icon and is optional to have.	
Class		installing your game on 'clean machines'.	Passed	Game installs cleanly on a clean PC.	
Class		custom settings files, but only if they are in the user's folder (which they should be)	Passed	Uninstalling removes everything from the computer.	
Class		other resources	Passed	Game closes cleanly without crashing.	
Class		console output, etc	Passed	No visual debug artifacts are on the screen.	
Class		corner to wherever the team chooses provided it's clear and visible.	Passed	The version is shown in the bottom left corner of the main menu screen.	
Build Notes					
Class		Build Notes named "Chemical Overdrive M4 Build Notes.docx"	Passed	Uploaded into teams.	Approved by Prof Kaplan to be in .pdf
Class		Includes changes since the last weekly build	Passed	Updated new items and changes in the build notes.	
Class		Includes any cheat commands	Passed	Updated cheat commands.	
Class		Includes any known issues	Passed	Updated notes with any known issues.	

MILESTONE CHECKLISTS

WHAT IS THE MILESTONE CHECKLIST?

The Milestone Checklist is used at **major delivery points**. Focusing on **feature completion** and **polish level**.

- 1) Ensures the game **meets milestone goals** and **quality standards**.
- 2) Checks for:
 - a. Feature Completeness
 - b. Performance Stability
 - c. **Documentation** and **Reports** Updated

Design-specific work items for M4 (both build taskss and documents required for milestone)	Passed	Checked ClickUp, featured in the Backl
All tasks required for M4 based on M4 requirements	Passed	Checked ClickUp, featured in the Backl
All art assets needed for M4	Passed	Goes over what we'll be focusing on pr
All sound FX and music required for M4	Passed	Featured in the Overall Audio Review t
User stories	Passed	Checked ClickUp
Each team member has work items assigned to them in this production system	Passed	Checked the Backlog channel
Style Sample (Final)		
Style Sample extended to at least 2 minutes in duration	Passed	Made it 2 minutes long.
Style Sample : Make Clear the Main Genre	Passed	It's all EDM and metal.
Style Sample: Instrumentation/Orchestration is clear	Passed	It's all EDM and metal.
Style Sample: Representative of what the final score will sound like at a high level	Passed	Listened to it with a reference track of
Wwise Project		
UI SFX Menu hover, select, back	Passed	Used the menus in game.
Music with 4 main states (Menu, Main Play, Win, Lose) or equivalent	Passed	Played the music states.
SFX for core mechanics	Passed	Checked all mechanics in the game.
Player/character movement	Passed	Did all the movement abilities.
Ambience	Passed	Ambience was playing in-game.
Buses created and used	Passed	Used busses.
The above music and SFX is implemented in the game itself, to the extent that those featu	Passed	Played an executable of the build.
Wwise Project uploaded seperately to the MUS350L Moodle page	Passed	Uploaded it.
Audio Change Log uploaded to MUS350L Moodle page	Passed	Uploaded it.
Sound Zoo Enhancements		
Sound Zoo augmented so that you can traverse music states to hear the music states, inclu	Passed	Made multiple buttons to move throug
Submission		
All the below is uploaded to the Teams channel in M3 Folder:	Passed	All items accounted for
"ChemicalOverdrive M3 Build.exe"	Passed	Located in the M3 Folder on Teams
"ChemicalOverdrive M3 Build Notes.docx"	Passed	Located in the M3 Folder on Teams
"ChemicalOverdrive M3 Prototype Treatment.docx"	Passed	Located in the M3 Folder on Teams
"ChemicalOverdrive M3 User Research Report.docx"	Passed	Located in the M3 Folder on Teams

WHAT IS THE MILESTONE CHECKLIST NOT?

It is **NOT** the following:

- 1) It's **NOT** a **daily task list**.
- 2) It's **NOT** just the QA's responsibility.
Each department has a shared responsibility.
- 3) It's **NOT** just a formality.

Design-specific work items for M4 (both build tasks and documents required for milestone)	Passed	Checked ClickUp, featured in the Backlog
All tasks required for M4 based on M4 requirements	Passed	Checked ClickUp, featured in the Backlog
All art assets needed for M4	Passed	Goes over what we'll be focusing on for M4
All sound FX and music required for M4	Passed	Featured in the Overall Audio Review table
User stories	Passed	Checked ClickUp
Each team member has work items assigned to them in this production system	Passed	Checked the Backlog channel
Style Sample (Final)		
Style Sample extended to at least 2 minutes in duration	Passed	Made it 2 minutes long.
Style Sample : Make Clear the Main Genre	Passed	It's all EDM and metal.
Style Sample: Instrumentation/Orchestration is clear	Passed	It's all EDM and metal.
Style Sample: Representative of what the final score will sound like at a high level	Passed	Listened to it with a reference track of the game
Wwise Project		
UI SFX Menu hover, select, back	Passed	Used the menus in game.
Music with 4 main states (Menu, Main Play, Win, Lose) or equivalent	Passed	Played the music states.
SFX for core mechanics	Passed	Checked all mechanics in the game.
Player/character movement	Passed	Did all the movement abilities.
Ambience	Passed	Ambience was playing in-game.
Buses created and used	Passed	Used busses.
The above music and SFX is implemented in the game itself, to the extent that those features are used	Passed	Played an executable of the build.
Wwise Project uploaded separately to the MUS350L Moodle page	Passed	Uploaded it.
Audio Change Log uploaded to MUS350L Moodle page	Passed	Uploaded it.
Sound Zoo Enhancements		
Sound Zoo augmented so that you can traverse music states to hear the music states, including all states	Passed	Made multiple buttons to move through the states
Submission

"ChemicalOverdrive M3 Build.exe"	Passed	Located in the M3 Folder on Teams
"ChemicalOverdrive M3 Build Notes.docx"	Passed	Located in the M3 Folder on Teams
"ChemicalOverdrive M3 Prototype Treatment.docx"	Passed	Located in the M3 Folder on Teams
"ChemicalOverdrive M3 User Research Report.docx"	Passed	Located in the M3 Folder on Teams

MILESTONE CHECKLIST EXAMPLE

Provided By - Cactus Garden

DO I DO ANYTHING WITH THE CHECKLISTS AFTER ITS DONE?

- You aren't done with the checklist, and it's not done with you.
- After submitting a build, it is **vital** you go over it with your leads or team.
 - During the following lab, you should share what went well, and what went wrong.
- Never be afraid to speak up if something isn't up to your QA standards! It's your job!

QUIZ AND QUESTION TIME!

- What are some examples of what a Build Checklist is and isn't?
- What are some examples of what a Milestone Checklist is and isn't?

BUG REPORTING

The difference between an efficient development cycle and a chaotic one.

BUG REPORT FORM

Thank you for taking the time to submit a bug or feedback. We read all comments!

Report Type:

FEEDBACK

BUG

 Comment:

(Required)

Severity:

☐ Attach save data

☒ Attach screenshot

Retake screenshot

SEND

WHAT IS BUG REPORTING?

- Bug Reporting is the process of **identifying, documenting, and communicating** problems in the game.
- A *good* report helps developers **reproduce, understand, and fix** an issue.
- It's not just “something's broken”, think of it as “something's broken, and here's how you can see it and fix it”

THE ANATOMY OF A BUG REPORT

“A bug report, at minimum, needs:

- Priority
- Title (for identification)
- Description
- Reproduction Steps
- Who found it (for further info)”

- David Porter, DigiPen Alum, Junior
Technical QA Analyst @ CD Projekt Red

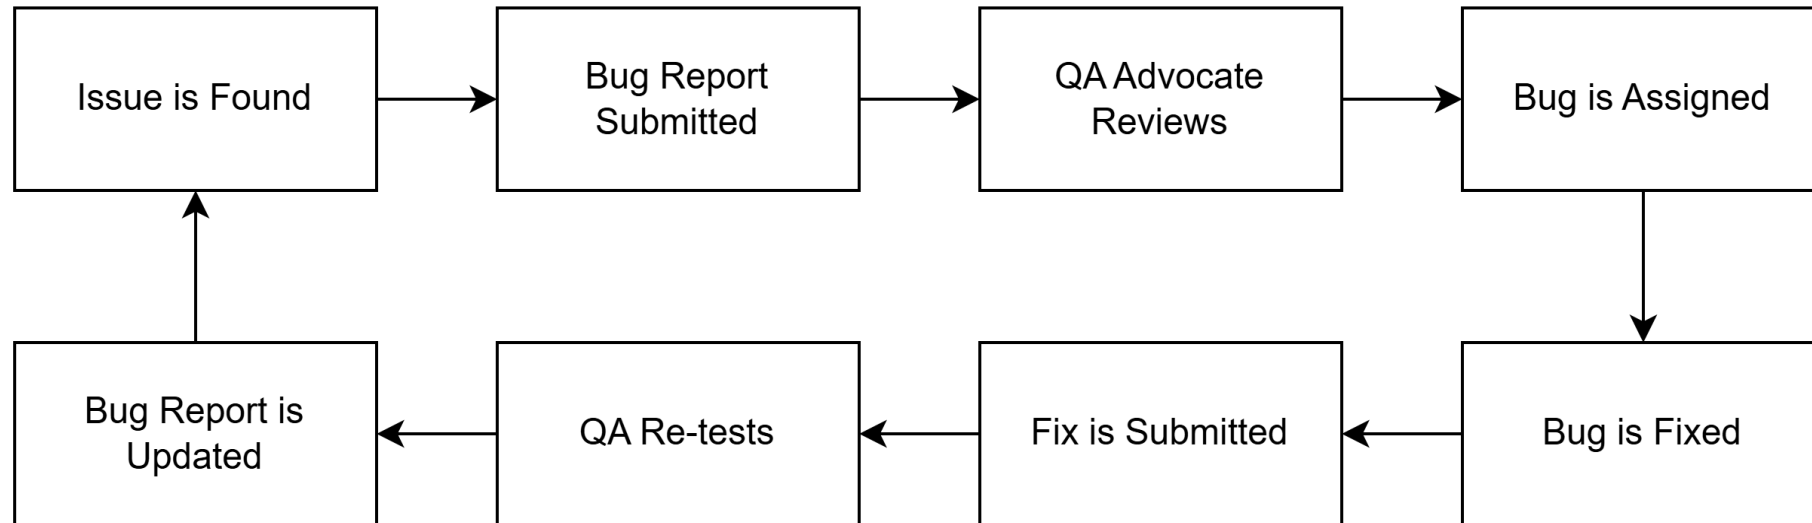

Additional **Suggested** Key Fields:

- Build Version
- Category
- Expected Result
- Actual Result
- Attachments (Screenshots, videos, console logs)
- Status (Open, In Progress, Fixed)

HOW YOUR TEAM SHOULD DO IT

- **Avoid** subjective language
 - “This is terrible, player dies randomly” -> “Player dies immediately after clipping on any object”
 - Reproduction steps are the **heart** of a bug report. They need to be **precise, ordered, and testable** by a member who didn't originally find the bug.
 - Always attach **evidence**
 - Classify **bug severity** (Blocker, Critical, Minor, etc.)
-

BUG REPORT WORKFLOW

Bug Reports **need** to be communicated immediately and should be checked **daily**. Including the status of previous existing bugs.

“WHERE ARE MY TEMPLATES AND EXAMPLE?”

- I have provided a rough template for bug reporting in my Task Management Dashboard. It can be located in Teams.
- Existing softwares such as Jira/Trello/ClickUp
- Google Forms or Microsoft Forms

EXAMPLE BUG REPORT

LET'S DEFINE OUR FIELDS

- **Priority:** Urgent/Medium/Low?
- **Title:** Shooting welcome sign twice ends game
- **Description:** In Level 1, shooting the welcome sign twice ends the game
- **Reproduction Steps:** Go To Level 1 -> Have Default Gun Selected -> Shoot Sign Twice
- **Who Found It:** Julian Loaiza
- **Build Version:** 1.0.2
- **Category:** Tech

LET'S DEFINE OUR FIELDS

- **Expected Result:** Shooting the sign shouldn't cause anything
- **Actual Result:** Shooting the sign twice causes the game to end
- **Status:** Not Assigned

QUIZ AND QUESTION TIME!

- What is Bug Reporting?
- What are some fields you should have in Bug Reporting?
- What does the Bug Report workflow look like?

Demonstrate Calf Size		[Build Version] 1.0.3.3	SVN Commit ID:3		
Requirement Type Class / Project	Location In Build (If Necessary) ex: Level 1, Main Menu, Pause Menu, etc.	Description of Item to Check Be as detailed as possible - someone who isn't familiar with your project should be able to look at the test description and perform it	Testing Status Passed / Partial / Fail	How Check was Done Describe how items were checked to its current status	Comments/Issues Any comments or known issues for the item

Project	Levels	Player Control Instructions	Passed	In level one, instructions shown on left of screen.	
Project	Levels	Slidline down hills	Partial	Went down ramo and gained speed	

TEST MANAGEMENT

WHAT IS TEST MANAGEMENT?

It is the process of **organizing, planning, executing** and tracking all testing activities in a game project.

It ensures that testing is done **systematically**, covers all **areas of the game** and results are properly documented and communicated.

WHAT IS TEST MANAGEMENT?

“DO NOT NEGLECT THE TEDIOUS TESTS. Even if a mechanic has worked for the last 100 commits, all it takes is one bad commit and suddenly your player cannot move for a milestone. Automate what you can, but never neglect the basics”

– David Porter

WAIT, ISN'T THIS JUST THE CHECKLIST?

It ties into it perfectly, I'm so glad you all caught it.

But remember this, Test Management = Organized QA.

- “Plans *what* gets tested”
- “Executes *how* it's tested”
- “Tracks *what* failed”
- “Ensures no system is left untested”

SO, LET'S TALK ABOUT OTHER ASPECTS OF TESTING.

Did you catch the potentially one scary word that Porter had mentioned?

Automation.

“Automation sounds complex and scary (which it can be) but its only as big as you want it to be. A simple script that makes sure simulated inputs have the desired impact are SUPER easy to do and can be written in under an hour” – David Porter

QUIZ AND QUESTION TIME!

- How are you using Test Management in your team's QA Process?
- What could help with testing?

PRODUCTION COLLABORATION

HOW DO I COLLABORATE WITH PRODUCTION?

1) **Build Readiness**

- Production uses QA data to decide if the build is ready for milestones, and playtests.

2) **Task Prioritization**

- Checklist data, Bug Reports
- Track Trends (Recurring System Issues)

3) **Progress Tracking**

- Assess overall project health
- Spot where testing or stability lags behind

WHAT DOES THIS LOOK LIKE?

Have an **advocate meeting** once a week to go over:

- Quality Checklists
- Bug Reports
- Recurring issues
- Build Stability

This will help **Production** reassess priorities for future planning.

THANK YOU! ANY
QUESTIONS?

Julian Loaiza
